Class 4's scientists have been carrying out investigations into the effect of forces on objects. They had to use their maths skills and do some careful reading of scales. There were some surprises when the objects were measured in the air and then in water.

Mathematical challenges and scientific surprises

Pattern making in the New Unit

Investigating pattern is part of mathematical learning right from Nursery through to Year 6. It is good preparation for algebraic thinking. Here are some pictures of our Year 1 and Year 2 children enjoying their pattern-making activities with Numicon, Multilink, Unifix and assorted plastic shapes. It required concentration and problem solving skills but they look very pleased with the results!

Our Harvest Service

In the last newsletter we mentioned that Father Bernard had welcomed us to St. Mary's Church for our Harvest Festival at the end of September. Here are the beautiful baskets of fruit at the front of the church. Thank you to our music technicians and the children who took part in the service.

We love to celebrate our successes! Lunchtime stars, stars of the week and the winners of our handwriting and presentation prizes have lots to smile about. Remember that picture of Peanut dressed as a superhero? That was when he was trying to join Mrs. Walton's A team. He hasn't made it yet. You have to be **amazing** and **always** try hard **all** the time, Peanut! Here is the A team having lots of fun.

Please don't forget to put your children's names in their jumpers!

DON'T FORGET the New Unit Curriculum Evening on Tuesday 20th October – TONIGHT at 6.30pm. Come and see how our learning opportunities match the stage of development each child is ready for.
